

SATARK Pod Lead

One seat. A hundred districts.

Crashfree India · A Cars24 Commitment · September 2026

THE PROBLEM

India loses more than 1.7 lakh people on its roads every year. Much of it is enforcement failure, not fate: 64% of all e-challan value issued since 2015 remains unpaid — over ₹42,000 crore — and the Supreme Court has recorded that 56% of vehicles on Indian roads are uninsured. Vehicles with dozens of violations on public record keep driving until one of them kills.

WHAT SATARK IS

An AI enforcement co-pilot for traffic police, built by Crashfree India with Cars24. ANPR cameras check every passing vehicle against live VAHAN records — pending challans, insurance, PUC, fitness — and alert officers to intercept within ~10 seconds, with a full audit trail. Owner identity stays masked; the system sees the vehicle, not the person. On 4 August 2026 the Supreme Court (2026 INSC 793) directed the country to build this exact mechanism. It has been live in the field since June 2026: detected 12:16 pm, intercepted 12:17 pm — a vehicle carrying seven pending challans, stopped within one minute in Jaipur.

THE ROLE

- Own the mission end to end: take SATARK to the 100 highest-fatality districts (MoRTH's own list) by December 2027.
- Sit with police commissioners, transport secretaries and ministries; convince, sign MoUs, and stay until officers are intercepting.
- Run the pod like a founder: your pipeline, your targets, your weekly rhythm — with engineering, installation and funding behind you.
- Work directly with Crashfree India's leadership and Cars24's founders. Based in Gurugram; heavy travel; in seat by mid-October.

WHO WE ARE LOOKING FOR

Someone hired for purpose and impact, not for sales — who has run something of their own: a startup, a campaign, an organisation; failure counts, it teaches patience. A genuine public-service mindset: officials can tell in minutes whether the person across the table cares about road deaths or is closing a sale. Sharp and diligent enough to read court orders and police procedures, and to follow up for months unprompted. This work runs at two speeds — Rajkot signed in nine days, Pune took five months — and both must be fine.

This is not a sales job with government as the account, not a policy desk, and not a role where a plan is handed to you every Monday.

Apply: reply to the email with 200 words on something you have run, and why roads.
